MEDIAPhone

Connectivity Meets Communication

Bittell's innovative MediaPhone puts it all together.

With our MediaPhone solution, you have one integrated device that solves your in-room telephony needs, and provides a convenient guest interface for a wide range of media devices.

Concealed by a cover when not in use, interface and power ports give your guests the freedom to enjoy media on their personal portable devices. A hospitality-specific alarm/clock radio provides wakeup and additional entertainment options. And a full-featured hotel room phone with cordless handset delivers outstanding voice performance with the mobility that guests prefer.

MediaPhone's top cover conceals ports when not in use, for a clean and attractive in-room look.
